# Traceroute

The screenshot shows a Packet Tracer window titled "Laptop1" with tabs for Physical, Config, Desktop, Programming, and Attributes. The Desktop tab is active, displaying a Command Prompt window. The Command Prompt shows a sequence of commands and their outputs, including password prompts, enabling user mode, exiting the switch, attempting an SSH connection, and performing three traceroute operations from a router (R2) to different destinations. The traceroute results show hop counts, IP addresses, and round-trip times in milliseconds.
